

The Frostbuster can be used almost everywhere and for several applications:

1. For night frost protection in orchards for all kind of fruit, in vineyards, in greenhouses and plastic tunnels, for strawberries, raspberries, flowers, vegetables, apples, pears, peaches, plums etc.
2. To improve the fruit set in low temperature during blossom.
3. To raise the temperature in plastic tunnels, to bring forward the first harvest date in the beginning of the season, or to pick later at the end of the season.

Orchards

Vineyards

Greenhouses: fruit, vegetables, flowers.

Open fields: strawberries, artichokes, ...
